

HANDLING & STORAGE IAM ADHESIVE

This section does give you information about the safely handle and storage of IAM adhesive products. Please read carefully and follow the information provided to assure best results using our adhesive.

IAM 2-component adhesive resin “A” and hardener “B” can be stored up to 5 years. It is important that both components are sealed air tight in their separate plastic containers and stored in a cool and dark place.

Please note that component “B” is UVA/UVB sensitive.
Not expose a longer time at air and sunlight to avoid oxidation.

Make sure that IAM adhesive in its mixed and unmixed state is not get wet with moisture or fluids of any kind. IAM adhesive will be modified by moisture may lose its surface gloss and / or its bonding strength.

Keep away IAM adhesive out of children's reach.

IAM adhesive packing material, like most packaging materials, must be treated as industrial waste.

IAM adhesive is made from environmentally friendly materials and is safe to be handled with bare hands by most people. Skin oils, sweat and other impurities can impair the adhesive and degrading the quality of the bonding agent. We highly recommend you to wear plastic gloves during mixing and handling the adhesive.

Most people show no side effects when handling IAM adhesive. However, in the event of a possible allergic reaction we advise to seek medical assistance instantly.
